

MAKE YOUR MARK

with Locating & Marking Paint

Both APWA and Fluorescent colors are available in water-based and solvent-based formulations. One-coat coverage and Spray-Thru™ cap allow for inverted painting ease. Use on concrete, pavement, gravel, grass, brick, asphalt, athletic fields, utility, excavation, ground surveying and construction marking.

SPRAY-THRU™ CAP

Quik-Mark's Spray-Thru™ cap has a trigger area that is 50% wider than the competition, easily accommodating work gloves.

PERFORMANCE

Quik-Mark Inverted Marking Paints feature an advanced, UV-resistant, fast-drying formula that won't fade in extreme sun and adheres to hot, cold or wet surfaces.

APPLICATION IN HARSH CONDITIONS

High-delivery nozzle minimizes overspray on windy days. Fast-drying formula penetrates and adheres to hot or cold surfaces.

SAVES TIME AND MONEY

High-solids formula provides bold, bright, visible markings in one pass - saving on labor hours and paint used.

DRY TO THE TOUCH

Solvent-based paint is dry to the touch in 3 minutes, while water-based paint is dry to the touch in 10 minutes.

COVERAGE AREA

Each 17 oz. can of paint can cover from 468 linear feet to 664 linear feet.
